**P250 EZ\_Stairs 2.0** by *Oran Woody*. An easy intuitive macro to help you draw straight run or return 2D stair sections (7 style types) and stair plans. Input just a few settings and you are ready to go. It fills the gap that DataCAD's DCAD\_AEC Stair and 3D Stairs macro leave in accomplishing these common but complex drafting tasks. Now *updated* (again) to provide 15 more options for stair rails, including IBC compliant styles -- and *newly added* improved control, hints, and a

**P251 EZ\_Storefronts** by *Oran Woody*. Here is another "entry" in this line of easy intuitive macros, this time to help you draw a typical storefront, allowing you to set number of panels, frame sizes, and door with transom. 17 different style types and 14 variable settings. Now also with plan capability added! **\$10.00** 

### P252

**EZ\_Paneling** by Oran Woody. EZ\_Paneling is a macro that can be used to draw elevations of wood wall paneling quickly and easily. Sixteen styles are available that include: Full height flat panels (which can also be used to create a wainscot); Transom height flat panels with full flat panels below; Triple flat panels; Wainscot height flat panels with full flat panels above and more. \$10.00

## P253

**EZ\_Doors** by Oran Woody. EZ\_Doors is a macro that can be used to draw elevations of wood panel doors quickly and easily. Six primary styles with three variations each are available as shown in the illustration below. **\$10.00** 

# P254 EZ\_Detail Boxes by Oran Woody. A macro that can be used to draw 1 different types of detail boxes at an angle or direction and can snap to uniform buffer distance around text

St., Melrose, MA 02176-3714 USA (781)662-0020 Tel & Fax http://CheapTricksWrae.com

**P257 EZ\_Arches** by Oran Woody. Thinking of parking islands and curbs led to the creation of this macro that has a lot of general architectural use whenever you are doing fillet trim, arched windows, or, yes, even parking islands -- anytime you want offset arched components. This handy macro is **FREE** with any other EZ macro (P250-P256) or \$10.00

**B-EZ** by *Oran Woody*. Any TWO Prime (P) items from the EZ family of macros of your choice for the price of one B item. A \$20 value for only \$15.00.

M-EZ by *Oran Woody*. ALL of the Prime (P250-P257) items from the EZ family of macros. An \$70 value(!) for only \$35.00.

# A macro that can be used to draw 16 different types of detail boxes at any angle or direction and can snap to uniform buffer distance around text. \$10.00 RUETEO P255 **EZ\_Joist** by Oran Woody. This macro will draw elevation views of a realistic (but not engineered) open web steel joists to your specifications in the typical EZ methodology of "pick two points." This macro provides 3 main styles of parallel chord joists: K, LH, and DLH. \$10.00 P256 EZ\_Parking by Oran Woody. This macro will help you to layout parking lots by drawing a string of parking spaces along the line you indicate for parallel, perpendicular or angled (60° or 120°) in 8 different styles (5 variations), complete with curbs and wheel stops. \$10.00.
